

Farouk Yusuf

JUNIOR DATA ANALYST | DATA TECHNICIAN APPRENTICE

faroukyusuf.e@gmail.com • 07394175824 • Birmingham, B20 • Full Driving Licence

PROFESSIONAL PROFILE

Research and data professional seeking a Junior Data Analyst or Data Technician apprenticeship. More than five years of experience collecting, cleaning, organising and interpreting quantitative and qualitative information across academic research, public-facing fieldwork and digital product development. Currently use Python to clean, sample and analyse a large social-media dataset and translate complex findings into clear written outputs. Seeking structured workplace training in operational data management, data quality and reporting while contributing careful analysis, strong communication and a customer-focused approach.

CORE SKILLS

Data collection, cleaning, validation, and quality checking; identifying discrepancies, patterns, and trends.

Python for data cleaning, sampling, and analysis of large text-based and social-media datasets; developing Excel, SQL, and Power BI skills.

Quantitative and qualitative research methods, including structured interviewing, content analysis, and evidence synthesis.

Accurate record keeping, documentation, confidentiality, GDPR awareness, and responsible handling of sensitive information.

Clear written and verbal communication with participants, colleagues, and wider stakeholders, explaining complex information accessibly.

Organisation, independent working, teamwork, customer care, problem-solving, and managing competing priorities.

Power BI, SQL, Python, R, Data Analysis, Data Visualization, Statistical Analysis, Data Engineering, Communication skills, IT skills, Attention to detail, Organisation skills, Customer care skills, Problem solving skills, Presentation skills, Administrative skills, Analytical skills, Team working.

WORK EXPERIENCE

Social Research Interviewer

Mar 2024 – Jan 2025

National Centre for Social Research

Birmingham

- Collected accurate information through structured interviews, meticulously adhering to study procedures and quality standards, demonstrating strong attention to detail in data gathering.
- Explained research clearly and effectively, built rapport with participants, and adapted communication styles to effectively engage with individuals from diverse backgrounds, aligning with stakeholder collaboration needs.
- Independently managed fieldwork, met deadlines, and ensured strict adherence to data-protection and confidentiality requirements, demonstrating organisational and administrative skills.

Support Worker

Feb 2022 – Dec 2022

Charis Care Solutions

Birmingham

- Maintained accurate daily records and documented information in accordance with confidentiality and safeguarding requirements, underscoring a commitment to data quality and integrity.
- Communicated with service users, colleagues, families and professionals to support continuity of care and respond to changing needs.
- Demonstrated patience, reliability, client care, organisation, and sound judgement in managing multiple responsibilities, reflecting strong teamwork and problem-solving capabilities.

WORK EXPERIENCE

Research Associate

Sep 2021 – Jan 2022

University of Birmingham

- Supported an international research project through evidence collection, data organisation and analysis.
- Maintained accurate and accessible research materials, produced clear written outputs and completed assigned work within project deadlines.
- Collaborated with researchers and contributed to the effective delivery of project activities.

EDUCATION

The Development Manager (TDM)

Jul 2026 – Oct 2026

Skills Bootcamp – Data and AI

University of Birmingham

2022 – Present

PhD in International Development

University of Birmingham

2021 – 2022

MA Social Research (African Studies)

Grade: Merit

University of Birmingham

2020 – 2021

MSc Conflict, Statebuilding and Development

Grade: Distinction

Ahmadu Bello University, Zaria

2014 – 2019

BSc Geography

Grade: First Class Honours

SELECTED DATA AND DIGITAL PROJECTS

Doctoral Research: Migration and Social-Media Data

2022–Present

- Built and managed a research dataset of approximately 29,000 social-media posts alongside 19 in-depth interviews, combining quantitative and qualitative evidence.
- Use Python to clean, sample and organise the social-media data; check records for relevance and consistency; and maintain a documented analysis process.
- Identify patterns across large volumes of text and communicate findings through structured reports, presentations and academic writing.

Used Python

uHired: AI-Supported Job-Search Platform

Current

- Helped build and improve a live platform that attracted more than 700 users within four months through organic search.
- Translate user needs into feature requirements, test AI-supported functionality, identify bugs and document improvements for implementation.

Used Gemini and Claude Code

Thessra: AI-Assisted Academic Reading App

Current

- Developed and tested features for reading, organising and interacting with academic documents, strengthening product thinking, documentation and user-focused problem-solving.

Used Gemini and Claude Code
